PROFESSIONAL SUMMARY:

Software Test Engineer with 4+ years of experience in Networking and Telecommunications at Amdocs. Expert in test automation using Java based **Selenium WebDriver** and Python based **Robot Framework**. Strong experience in **automation framework design, regression testing, and API testing**. Consistently improving test coverage and reducing execution time. Dedicated to ensuring software quality excellence through rigorous testing practices and Agile methodologies.

WORK EXPERIENCE:

Amdocs Pune, India.

January 2022 - Present

Software Test Engineer

- Over 4 years of experience in Software Testing, including analysis, design, and end-to-end Manual Testing with working knowledge of Automation Testing for client/server and web-based applications.
- Proficient in Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC), with hands-on experience in multiple testing methodologies.
- Skilled in executing Smoke Testing, Regression Testing, Progression Testing, and User Story testing, ensuring complete requirement coverage through functional validation and business scenario testing..
- Delivered high-quality solutions by aligning business requirements, ensuring timely delivery and adherence to quality standards.
- Experienced in defect management and bug tracking using JIRA, QC/ALM, and I-Track.
- Proficient in API Testing with SoapUI and Postman.
- Hands-on experience in Amdocs Billing systems, including bill run validation, charge verification, and billing cycle testing.
- Extensive expertise in Usages/Events processing, usage run validation, and dump-load processes.
- Worked extensively on Salesforce CRM testing, covering order management, customer lifecycle flows, and system integrations.
- Strong ability to work independently and collaboratively in team environments, with effective task prioritization and time management.
- Quick adaptability to new technologies and tools, enhancing testing efficiency and effectiveness.
- Active participant in Agile processes, including sprint planning, daily stand-ups, and functional test case walkthroughs.

TECHNICAL SKILLS:

- Programming languages : Core Java, Python.
- Automation Tools : Selenium Web Driver, Robot Framework.
- Frameworks : Page Object Model, Data-Driven Test.
- API Testing : SoapUI, Postman.
- Containerization : Kubernetes.
- CI/CD : Jenkins.
- Version Control : Git, GitHub.
- Defect Tracking tools : JIRA, Octane, and I-Track.
- Testing : Manual Testing, Regression, Progression, API Testing, and Test cases Execution.
- Database : SQL.
- Management : Project Management, Team Player, Self-Motivated, and Strong communication skills.
- Methodologies : Agile/Scrum.
- Applications : Amdocs CRM, Salesforce CRM

PROJECTS:

Project 1 **AT&T(BSSE)**
Period: Nov 2023 - Present
Domain: Telecom

Roles & Responsibilities:

- Executed various testing activities like functional testing, regression, progression and smoke testing.
- Worked on API testing using Postman and SoapUI for validating application workflows.

- Identified defects and ensured the delivery of a bug-free, high-quality product.
- Utilized I-Track for defect management, including testing and re-testing of defects.

Project 2 **PLDT**
 Period: April 2023 - Oct 2023
 Domain: Telecom

Roles & Responsibilities:

- Implemented test cases using CSP and HSTK applications to ensure accurate functionality.
- Created Service Orders and completed End-to-End testing.
- Conducted test execution, defect reporting, and collaborated on defect resolution.
- Utilized ALM for defect management, test case uploads, and test tracking.
- Performed UI validation using CSP and FUSE API for consistent application behavior.
- Contributed as a team member, understanding wrap-around development and testing processes.
- Actively participated in daily Scrum meetings to discuss test case updates and progress.

Project 3 **Comcast**
 Period: Jan 2022 - March 2023
 Domain: Telecom

Roles & Responsibilities:

- Performed Regression and Progression scenarios to validate application functionality.
- Accomplished Sanity Testing, Defect Retesting, and Scenario Validation to ensure quality.
- Used Ginger Automation Tool partially to execute scenarios.
- Managed defects using Octane, including bug logging, tracking, and resolution.
- Implemented test scenarios using CPQ and OSO applications.
- Executed test scenarios using CRM applications.
- Actively participated in Scrum meetings to discuss project progress and testing updates.

EDUCATION:

Bachelor of Technology :	UCET, MG University (CGPA 7.47/10)	2017 - 2021
Intermediate :	Government Junior College (86.6/100%) (State Board of Intermediate Education)	2015 - 2017
S.S.C :	Sri Saraswathi Vidya Mandir High School (CGPA 9.0/10) (State Board of Secondary Education)	2004 – 2015

CERTIFICATIONS:

- Software Testing Certification - QSpiders.

ACHIEVEMENTS:

- Received key player Award for Project Transition Contributions - 2024
- Appreciated by project client for on-time delivery with high quality - 2025

Declaration:

Hereby I declare that all the statements made in this resume are completely true and I will produce original documents when required.
